

The following is information gathered to help architects and designers figure out how many possible LEED points our products could contribute. The information on this page was taken from the USGBC's rating system LEED 2009 For Schools New Construction and Major Renovations.

Materials and Resources

MR Credit 4: Recycled Content (1-2 points)

List Industries buys most of their steel direct from the mill. The steel bought is made up of 50.4% post-consumer recycled content and 10.3% post-industrial/pre-consumer.

MR Credit 5: Regional Materials (1-2 points)

Art Metal Products has their manufacturing facility located in Deerfield Beach, FL. However, products are shipped to six Distribution Centers located across the country where they are stored and/or assembled. Those locations are: Carrollton, TX, Munster, IN, Memphis, TN, Battleboro, NC, and Apopka, FL.

MR Credit 7: Certified Wood (1 point)

List Industries have wood lockers available that are FSC (Forest Stewardship Council) Certified.

Innovation in Design

ID Credit 1: Innovation in Design (1-4 points)

Path 1. Innovation in Design

List Industries being Greenguard Children and Schools Certified could be a possible contribute to Innovation in Design if many of the other products going into the building are Greenguard Children and Schools Certified as well.
